

12 Crystal Skull Perfect Circle Template

Lay the template on the floor and secure it with a thumbtack on the top left and bottom right. Cut a piece of string 30 inches and tie a loop in both ends. Secure one end of the string with a thumbtack in the center of the template and line the string with each notch in the template and place a thumbtack at each point. Once all 12 points are completed remove the template from floor leaving the center thumbtack. Take your 12 Crystal Skulls and place one at each point on the floor. There you have it a perfect circle with the 12 points to place your Crystal Skulls and it is wonderful feeling being in the center of the circle.

Alternate Method:

Lay the template on the floor and secure it with masking tape. Use a yard stick, ruler or measuring tape to mark the distance from the center origin to the desired distance by positioning it through each one of the twelve marking points. You can use chalk or masking tape to mark the exact position of each crystal skull. There you have it a perfect circle with the 12 points to place your Crystal Skulls and it is wonderful feeling being in the center of the circle.
